

**Microbe
Control®**

RESTRICTED
STOCKS

Microbe Control is a continuous control of bacteria in an enclosed environment

Approved by: FSANZ | Kilford & Kilford Pty Ltd | FDA | HACCP | IARC | ASCC

EFFECTIVE AGAINST COVID-19

Microbe Control is a gel which sits in your air-conditioning ducting system. Its actives reduce the amount of Colony Forming Unit's (CFU's) in the ducting itself and thus throughout the hospital and most importantly, patient rooms.

KILLS

**STAPHYLOCOCCUS
AUREUS**

KILLS

**MICROCOCCUS
LUTEUS**

KILLS

**99.99%
OF BACTERIA**

Tests performed on
SARS equivalent virus.

Used in Westmead
Hospital and other
Australian Hospitals.

A sample has been
approved for testing
against COVID-19.

■ Perfect in a lockdown situation.

We can show steady control of germs in an airborne indoor situation.

WE HAVE THE SOLUTION

Dear Mr Anslow,

Re: Ausmech Air and Microbe Control contribution to Improved Air Quality.

We at Westmead Hospital would like to recognise the contribution made by Ausmech Air and Hospital Grade Microbe Control to improving Indoor air quality.

Your continued focus to improve indoor air quality through the treatment of Air Conditioning systems with Hospital Grade Microbe Control is appreciated.

Since the introduction we have witnessed noticeable improvements in the condition of Air Conditioning system and the results from Air Quality testing.

We thank Ausmech Air and the team for there continued support and success to improve the Air Quality at Westmead Hospital.

Yours sincerely

Cyrus Tolentino

District Maintenance Operations Manager
Western Sydney Local Health District
